AIVOA PHARMACEUTICALS MANUFACTURING CORP.
GLOBAL QUALITY OPERATIONS & COMPLIANCE DIVISION

PHARMACEUTICAL API QUALITY DEVIATION & INVESTIGATION REPORT

Deviation Number:	DEV-2026-1055	**Classification:**	Moderate / Physical Appearance & Color
Product / API Name:	Acetaminophen (Paracetamol) Micropowder API	**Batch / Lot Number:**	APAP-2026-118
Manufacturing Stage:	Stage 3: Decolorization & Crystallization	**Equipment Tag:**	Decolorization Tank TK-201 / Filter Press FP-02
Date of Occurrence:	2026-10-19 22:10 UTC	**Date of Discovery:**	2026-10-20 08:30 UTC
Material / Lot ID:	Activated Carbon Norit A-CA-2201	**Reporting Unit:**	Physical Testing & Raw Quality Lab

1. OBSERVED DEVIATION & ANALYTICAL TEST RESULTS

Test Parameter	Regulatory Specification	Observed Lab Result	Test Methodology / Instrument
Appearance of Solution (400 nm Absorbance)	**Absorbance NMT 0.030 AU**	**0.082 AU [OOS]**	Spectrophotometric UV-Vis 400nm
Powder Appearance	**Pure white crystalline powder**	**Slight pink / off-white tint**	Visual Inspection against white tile
Assay (HPLC)	99.0% - 101.0%	99.7%	USP HPLC 243nm
Related Substance: 4-Aminophenol	NMT 50 ppm	38 ppm	HPLC Ion Pair

2. INCIDENT CHRONOLOGY & FORENSIC NARRATIVE

Visual examination of Acetaminophen API batch APAP-2026-118 showed an abnormal pinkish tint, and solution absorbance at 400 nm was 0.082 AU (limit NMT 0.030 AU). Investigation of filter press FP-02 showed bypass tearing in plate gasket #4, allowing unadsorbed trace polymeric quinoid chromophores and 4-aminophenol oxidation complexes to pass downstream into the crystallization vessel.

3. IMMEDIATE CONTAINMENT ACTIONS TAKEN

1. 2,400 kg of bulk crystallized Paracetamol placed under quarantine warehouse lock.
2. Filter press FP-02 dismantled; ruptured gasket #4 tagged and retained as forensic evidence.
3. Preventive carbon filter post-filtration membrane integrity test instituted.
